Science experiences that engage, challenge and inspire

INSPIRIA is a science center where visitors are encouraged to learn through interactive exhibitions. Through the themes; Energy, Space, Environment and Health - moms, dads, grandparents and kids are encouraged to learn more about these themes by exploring and experimenting the different exhibitions and participate in the various activities offered throughout the day.

Being a guest at INSPIRIA is a great way to spend time with the family and with interactive exhibitions the visitors can store their experiences online, access them and share their memories with friends and family.

During weekends and holidays the center program expands into a full use of the center which includes the following:

- Planetarium – one of Scandinavia’s most advanced full view Planetariums
- Exploration of the solar system and universe
- 4400 square meters of exhibitions counting more than 70 installations to explore
- Workshops with scientific activities
- Gyro – how does it feel to be upside-down?
